# KLARA SEDLO

b.1993, Czech Republic  
Lives in Prague, Czech Republic

*"In my work, I focus mainly on dreams, the subconscious mind and psychology. How do we perceive events or emotions? What would we look like when overwhelmed by feelings if these feelings were visible? What would certain relationships look like if represented by symbols or colors? These are questions that haunt me the most. I use the dream language often—my artworks are as symbolic, bizarre, and surreal as dreams. I depict different states of minds, characters or relationships as if they were seen through weird dream lenses."*
